

POWERFUL AERATION & ATTRACTIVE DISPLAYS.

OFFICIAL EXCLUSIVE AUSTRALIAN
DISTRIBUTOR OF OTTERBINE

OTTERBINE'S AERATING FOUNTAINS CAN TRANSFORM AN UNINSPIRING WATER HAZARD INTO A CENTERPIECE THAT STANDS OUT FROM THE REST. OUR SURFACE SPRAY AERATORS ARE ENGINEERED TO PROVIDE GREATER WATER QUALITY ALONG WITH BEAUTIFUL, DYNAMIC, SPRAY PATTERNS.

"As an Audubon International Signature Course, water quality is important at Cateechee Golf Club. We have a 10 million gallon effluent water holding pond on the golf course that initially presented problems with algae and low oxygen. These problems led to odours and fish kills. We installed two Otterbine aerators and one Otterbine sub-aerator about ten years ago. These units solved our issues and have been virtually problem-free. I highly recommend Otterbine products."

Buck Workman, CGCS Cateechee Golf Club, Hartwell, GA

TREATING WATER ABOVE & BELOW THE SURFACE.

OFFICIAL EXCLUSIVE AUSTRALIAN
DISTRIBUTOR OF OTTERBINE

OTTERBINE'S SURFACE AERATORS ARE THE IDEAL LAKE MANAGEMENT SOLUTION. IMPROVING WATER QUALITY, REDUCING MOSQUITOES AND ALGAE AS WELL AS UNPLEASANT ODOURS, WITHOUT USING CHEMICALS

Constructed from 316 Stainless Steel, thermoplastics, and rugged low-speed motors, these systems are designed to withstand the demands of harsh Australian conditions and severe aquatic environments.

"The pond regularly became stagnant in the hot weather due to the lack of moving water and low oxygen levels, but the addition of an Otterbine aerator has worked wonders. The pond has been cleaned up dramatically and the water is clear. You can see and smell the difference!"

Eoin Riddel, Course Manager, Royal Dornoch Golf Club
